---

If I understand correctly, the End User Certificates represent material that Explo sold to other parties. How can I find out who besides General Dynamics (the Army) send explosives to Explo? Am I overlooking something?

Yes, there were 6 facilities Explo sold explosive/reactive materials to. There were 2 facilities that Explo sold scrap metal to. There were 3 or 4 that sent materials to Explo for demil.

Chuck, I am working flexiplace today, and going through a lot of the Explo information in my possession.  
Can you tell me if we have any evidence that Explo had any other customers, other than General Dynamics and the Army?
